**CONFERENCE MESSAGE**

I have known Mr A Mahalingam for now nearly a decade. I am impressed with the enthusiasm, zeal and passion he puts into whatever he does.

Hospital Acquired Infections are one of the most common preventable causes of increased morbidity and mortality, they can be prevented by something as simple as practicing effective hand hygiene.

Implementing bundles, a robust antibiotic stewardship protocol and a proactive Hospital wide Infection control program is the way forward to prevent the top causes of Hospital Acquired Infections and I am extremely pleased that the Twin Tech Academy Business Management solutions, Chennai is focusing on such an important topic.

My best wishes to Twin Tech Academy, the participants and Mr A Mahalingam for a successful program."

Warm regards,

**Dr Clive Fernandes, MD, MHA**

Group Clinical Director at Wockhardt Hospitals, Mumbai &  
JCI Consultant @ Joint Commission International
